

PerForm™

We're putting innovation first. Permanent installation of very long VSP arrays is now possible. Up to 160 3C levels can be deployed on land, offshore and subsea environments with PerForm™ – *only available at READ.*

- + 150+ 3C levels installed on completion tubing
- + Patented burst disk decoupling mechanism
- + Land, dry tree and wet tree pass through
- + Single pin subsea pass through capability
- + Time-lapse 3DVSP for field development
- + Microseismic data for reservoir monitoring
- + ROV used for subsea 4DVSP
- + High temperature
- + High data transmission rate > 8Mb/s
- + Fiber Optic or Electronic Communications
- + Programmable 2ms - 1/4ms Sample Rate
- + Compatible with other sensor types
- + Compatible with READ HybridVSP™

PerForm™ telemetry receiver

Tubing deployed for monitoring and VSP applications

PerForm™ mandrel and patented release mechanism
